CAPABILITIES OVERVIEW

SigNetCyber LLC

Service-Disabled Veteran-Owned Small Business

Intelligence, secured.

Applied AI, cybersecurity, and integrated infrastructure for government, commercial, education, and training environments.

CORE CAPABILITIES

Applied AI & automation

AI assistants, document and workflow automation, custom applications, system integrations, and private deployment planning.

Cybersecurity

NIST SP 800-171 and CMMC readiness support, risk assessment, vulnerability management, secure architecture, incident preparedness, and training.

Integrated infrastructure

AV and collaboration, access control and video, networks and wireless surveys, managed IT, fiber, structured cabling, testing, and closeout.

SENTIINT AI

AI tools for educators and learners: teaching-material generation, interactive lessons, discussions, oral defenses, course support, and learning analytics.

In use at Metropolitan State University of Denver.

HOW WE DELIVER

01 Define

Requirements, interfaces, constraints, and acceptance criteria.

02 Engineer & implement

Design, development, configuration, installation, and integration.

03 Verify & hand over

Functional testing, documentation, user orientation, and support handoff.

START WITH THE REQUIREMENT

Bring the objective, current environment, users, and timeline. Scope a focused engagement or a phased modernization.

jackson@signetcyber.com (719) 201-9623 signetcyber.com

Established 2018 | AI first. Cybersecurity throughout. Infrastructure that supports both.

October 2026

Client confidentiality is part of the engagement.
